

E201 AND E202 ROOM UNITS

E201 is a room unit with display and buttons for easy handling. The room unit can only be used together with the C2xx series control units. The room unit display and buttons can be used to access the control units menus and parameters.

E202 is a room unit with display and buttons for easy handling. The button C under the lid is dedicated for fan speed control. The room unit can only be used together with the C2xx series control units. The room unit display and buttons can be used to access the control units menus and parameters.

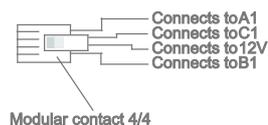

The set point range and button functions can be adjusted on the connected control unit.

Wiring

The room units communicate with the control unit via ZoneBus communication. The cable between the room unit and control unit should be a K43 cable which has a modular contact for the room unit. The cable can be ordered in different lengths up to 20 meter.

You can also make your own cables by following the instruction below:

Technical data:

Supply	12 Vdc, 1 W (supplied from C221/C222)
Set point	19...25 °C
Accuracy (measuring inaccuracy)	±0.5 °C
Operating conditions	
temperature	5...40 °C
humidity	0...85 % rH (non-cond.)
Wiring terminals	1,5 mm ²
Housing	ABS plastic, IP30
Dimensions (w x h x d)	89 x 89 x 26 mm

Ordering guide:

Model	Product number	Description
E201-01	1155090	room unit with display
E202-01	1155091	room unit with display for fan speed control
