SPC Manager Software

Remote user management tool

- Multi-panel remote operation
- Remote user management
- Remote access data management

Multi-panel remote operation: SPC Manager is a software-based user management tool, which allows you to manage, monitor and control system resources (for example,. doors, areas and outputs) across multiple SPC systems in a quick and efficient way.

Remote user management: SPC Manager supports the concept of global user data across a complete install base of SPC systems, which allows central management of user information for a group of SPC systems in an efficient way.

Multi-panel remote access data management: SPC Manager allows you to remotely manage access data such as cards, calendars and access rights across multiple systems. Its powerful SPC system user profiles provide an easy and quick way to create new users in a daily working environment.
