Sales and Delivery Release –
ARF6100 Starter Kit and ARF6110 License Card

Siemens' Security Products business segment is pleased to announce the sales and delivery release of the ARF6100 Starter Kit and ARF6110 License Card. With help of these new products, it is possible to download the new DESfire EV1 firmware to previously installed AR6181-MS and AR6182-MS readers.

The ARF6100 Starter Kit includes the new reader firmware and one ARF6110 License Card that contains 10 firmware download licenses. If you need to upgrade more than 10 readers, or if you already have an ARF6100 Starter Kit, additional ARF6110 License Cards can be ordered separately.

When used in SiPass integrated systems, please note that DESfire EV1 upgraded AR618x-MS readers can only be used with software versions MP2.4 SP3 or later.
