

## STRAP-ON TEMPERATURE SENSOR TEPK NTC 1.8

TEPK NTC 1.8 temperature sensor is designed for pipe strap-on installations in heating and cooling applications.

Temperature is detected by a NTC sensor element with a nominal resistance of 1.8 k $\Omega$  at 25 °C.

There is used a heat conducting tape to ensure the good contact between the sensor and pipe. Sensor is mounted on the pipe by using a cable tie.
